HARDY GIANT CULTIVATED BLUEBERRIES

Not only does the blueberry produce big juicy berries 2 to 3 times as large as common blueberries, but it is ornamental on the lawn or in the shrubbery border and very easy to grow. The foliage is dark green, long and narrow, blossoms bell-shaped and pinkish white. During the autumn the leaves turn bronze, and during the winter months the twigs are red. The bushes will grow to the height of 8 feet.

For the best results plant on acid soil. Low muck or sand soils are usually very acid. Plant two or more plants to insure proper pollinization. If your soil is not acidity, mix the soil with our SPECIAL IMPORTED PEAT MOSS, see page 48. Set the plant and fill the hole with the same mixture and keep the soil moist.

RUBEL — Early. The bush is upright, very vigorous, hardy and productive. Ships well. Is a producer of large fruit, and a heavy bearer. The winter color of the young wood is a rich red.

	1	2	5	10	25
4 yr. 18-24 inch plants	$2.10	$3.90	$8.75	$16.00	$37.50

JERSEY — Midseason. Bushes grow upright, fruit is extra large and firm, good quality. The winter color of the young wood is a beautiful light red over a gold brown. One of the most popular variety of blueberries grown, the best commercial sort.

	1	2	5	10	25
3 yr. 12-18 inch plants	$1.35	$2.55	$5.15	$ 9.70	$21.50
4 yr. 18-24 inch plants	2.10	3.90	8.75	16.00	37.50
5 yr. 24-36 inch plants	2.50	4.65	10.15	19.00	44.50

We suggest from 5 to 8 plants for a family of five people. Set our hardy plants this year for pleasure and profits. We recommend the larger plants because they will bear more fruit sooner.

EARLIEBLUE — This is the best early blueberry, it has large, attractive fruit and a very good flavor. Berry clusters are tight and tend to ripen uniformly. The large berries are resistant to cracking and very hardy thus making a fine commercial variety.

	1	2	5	10	25
3 yr. 12-18 inch plants	$2.00	$3.70	$8.25	$15.00	$33.45
4 yr. 18-24 inch plants	2.45	4.60	10.50	19.45	46.00

RANCOCAS — A standard variety being widely planted because of its hardiness and dependable production. It is an early variety and is a heavy cropper. The berries are of medium size and are light blue at first, but later become dark blue. Rancocas is a hardy vigorous upright grower.

	1	2	5	10	25
3 yr. 12-18 inch plants	$1.35	$2.55	$5.15	$9.85	$21.50

BLUERAY — Berries of this fine early variety are of large size and light blue color. They are tart, of good flavor and are firm. Plants are vigorous and of a somewhat spreading shape. Blueray does well in cold climates.

	1	2	5	10
3 yr. 12-18 inch plants	$2.15	$3.95	$8.85	$16.45

GIANT BLUEBERRIES

Just Think! Giant berries, many three-fourths of an inch across. Plump and juicy, sweet and full-flavored. Mild enough to be included in any diet. Fresh ripe berries require no sugar, canned berries very little. Ideal for freezing and very delicious for pies. Every bush is a heavy producer, four bushes in your yard will provide enough berries for pies throughout the season.

BERKELEY — Mid-season. One of the finest of all blueberries. Berries are extra large with many almost the size of a quarter. They are light blue in color and are produced in long, loose clusters. Fruit of Berkeley is firm and has a mild delicious flavor. The plant is amazingly vigorous, having very strong branches and large glossy leaves.

JUST A LITTLE GET-ACQUAINTED CHAT . . .

A Few Simple Reasons Why We Sell For Less

You will find that this money saving book is made especially for farmers, home owners, fruit growers and gardeners, giving them a chance to buy better stock for less, direct from the nursery at wholesale prices.

We can sell better stock for less because we are not jobbers or dealers. We own and operate our own farms in the heart of the Michigan fruit belt, our farms are of the best soils for developing good roots, hardy stock that will grow anywhere. We grow a tremendous amount of stock, which is handled only once, direct from our farms to you our many customers.

We sell direct from this catalog only — You have no agents or salesmen commissions to pay — thousands of satisfied customers can't be wrong.

We do not spend thousands of dollars on highly colored catalogs, because it is very costly and makes the stock more expensive, this extra cost must be added to the price of the stock, either in higher prices or poorer quality . . . it is the customer that finally pays.

We have no large, expensive, splashy advertising space, we depend largely upon our friends and our satisfied customers to advertise our stock. These extra savings are passed on to our customers in better stock for less money.

We can offer you good stock for less money because, first of all we have excellent soil, and next we have the latest equipment in up-to-the-minute tractors, automatic sprayers, planters, trenchers, power lifters, loaders, and many other labor-saving devices. All of these combined savings are passed on to our customers in lower prices and better stock.

In ordering your nursery stock needs from Zilke's you are assured of getting stock that is absolutely fresh in every way. Compare our fresh plants and trees with those that are kept in a frosty condition or in storage and in a dry condition for four or five months.

Order direct from Zilke's the grower and see the big difference.

FOR CUSTOMERS WHO LIKE TO CALL AT THE NURSERY

If you are interested in larger Evergreens, Shrubs or Shade trees than we list in this catalog, see page 17.

We are located directly ¼ mile west of Baroda, which is about 9 miles south of St. Joseph, on Cleveland Avenue. Watch for our sign on U. S. 12 Highway, 2 miles North of Bridgman or about 9 miles South of St. Joseph.

WE PAY POSTAGE ON SOME ITEMS LISTED IN THIS CATALOG

Please notice that we pay the postage on such items as bulbs, vines, perennials and strawberry plants, and they are so listed.

There are however some items that are not listed as prepaid parcel post, such as shade trees, fruit trees, roses, shrubs, evergreens and berry plants, because they are listed at such low price for our high grade quality stock that we cannot afford to pay the shipping charges.

For items that are not listed as prepaid see page 50 for shipping information.

In fairness to all of our customers it is impossible to list prepaid prices on every item that we sell because we ship to all parts of the United States.

We will fill your order with the same high grade quality stock regardless of the distance that you live from us, this is the only fair way, in other words "THE ZILKE FAIR METHOD OF DEALING".

A good share of the nursery stock can be shipped by parcel post, including 5 to 6 feet trees. Super size trees can also go parcel post with our scientific method of packing.

Send your order to ZILKE BROTHERS NURSERY the growers and be sure of the best in nursery stock.

DWARF OKA CHERRY

The flesh color is a rich, intense purplish black red. It is in all a very remarkable fruit to look at and surely a delight to eat. Jelly and jam made from Oka Cherries are as deliciously sweet as they are beautiful to look at. The Oka tree has a dwarf bushy habit and bears from the ground up.

Dwarf Oka Cherry

But the dawrf size in no way indicates the size of the crop of cherries, for the strength of the plant goes into fruit production and not into surplus tree growth and so consequently the limbs and branches burden themselves with fruit. **Plant 2 trees for perfect pollination. 2 year trees, 3 to 4 foot, $1.75 each, 2 for $3.25.**

DWARF BUSH CHERRY

Shapely, ornamental shrub, with long pointed gray-green leaves, silvery beneath. Covered with snow-white flowers in Spring. Cherries are in large clusters, easy to pick. To pay for a big expensive catalogue the quality of the material sold must be lowered or the price must be raised. Shrewd buyers appreciate this.

DWARF SOUR CHERRY

ZILKE'S HARDY NORTHERN GROWN TREES ARE BEST

Zilke's Peach Trees are all grown on 2-yr. old roots, well-branched, very heavily rooted. Our buds are selected from the finest orchards and special trees.

This year we are pleased to offer the New Richhaven and New Sunhaven which originated at the Michigan Agricultural Experiment Station by Stanley Johnson.

NEW RICHHAVEN—Richhaven ripens with Halehaven, about 14 days before Elberta, but because of its bright color, it might be picked 2 to 3 days before Halehaven. Fruits are larger than Halehaven, nearly round, and uniform in size and shape. The ground color is bright golden, overlaid with a large, bright red blush on the area exposed to the sun, with stripes of red and gold on the opposite side. Fuzz is so short and soft as to be nearly unnoticeable. Flesh is clear yellow with moderate amount of red near pit. Medium in texture and resistant to browning. Freestone. Excellent for commercial canning. Unusually thick, tough skin adds to handling and shipping ability of fruit. Trees are large, vigorous and productive. Exceptionally hardy.

NEW SUNHAVEN—Very Early! 40 Days Ahead Of Elberta. The success of Redhaven variety resulted in many requests for a variety of this type maturing earlier. Sunhaven is being introduced to meet this need. It ripens very early, 10 days before Redhaven and 40 days earlier than Elberta. Fruit is medium-large in size, nearly round, and uniform in shape. Skin color is much like Redhaven, largely bright red with enough bright golden color for pretty contrast. Short, soft fuzz, almost unnoticeable. Fruits keep and handle unusually well for such an early maturing variety. Flesh is clear yellow, fine-textured, firm, of good flavor and very resistant to browning. Sunhaven is a freestone when fully ripe. Its early ripening assures you of BIG PROFITS for your fruit.

NEW REDSKIN—A new variety that seems destined to become as popular as is Elberta today. A cross between Elberta and J. H. Hale, retaining the good qualities of both parents. Very red skin, hence its name. Fruit large and uniform, yellow fleshed and freestone. Self-pollenizing. Juicy and delicious. Excellent for shipping. Ideal for canning or freezing. Bears young; long lived and disease resistant.

Hansen Apricot

NEW HANSEN APRICOT

THE SUPER HARDY APRICOT

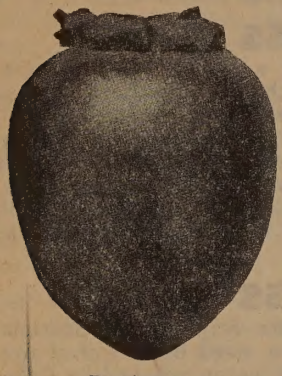
Hansen's new sensational Northwest hardy apricot. Recently introduced by Prof. N. E. Hansen, of South Dakota State College, who has been working for many years to produce hardy apricots that would be good eating and large size and still would withstand the rigors of Dakota's cold and drought. Two very important points of interest stand out in regard to these new apricots. One is that they are perhaps one of the most drought resistant of all trees, coming through the terrible droughts of 1933, 1934, and 1935 with flying colors—full foliage and no apparent effect whatever from the dry, hot weather, and with a great crop of fruit. The second point is that they are hardy almost anywhere in America, standing and bearing well in climates getting as low as 50 and 60 below zero. **Prices: 3 to 4 ft. trees, $1.55 each; 2 for $2.95; 4 to 5 ft. trees, $1.85 each; 2 for $3.45; King Size, 5 to 6 foot trees $2.25 each; 2 for $4.25.**

DWARF ORANGE QUINCE

Sometimes called Apple Quince. Fruit large, round with a short neck; color bright yellow; flesh tender, juicy and of excellent flavor. Highly regarded for jellies and preserves. Trees bear young. A good tree to plant on hillsides or where land is hard to work, as it requires very little care. **Good 2 to 3 ft. trees, $1.65 each; 2 for $3.00.**

PERSIMMON TREES

Trees are thrifty growers, will bear fruit in several years. Grows into a small tree, makes a very beautiful and valuable ornamental tree for the garden, street or lawn. Fruit is large, with golden yellow skin, changing to almost red when fully ripe. Fruit will hang on the tree for several weeks after ripe and will keep its fine rich flavor. **Prices: 2 to 3 foot trees, $1.15 each; 2 for $2.10.**



Persimmon

For Parcel Post Rates See Page 50.

RUSSIAN MULBERRY TREES

An ideal shade tree, luxuriant foliage, clean and hardy everywhere, a rapid grower. Bears an abundant crop of edible fruits which resemble blackberries and are very sweet. A few Russian Mulberry trees will save your cherry crops as the birds prefer the mulberry to cherries. The fruits ripen over a long period of time. **Prices: 3 to 4 ft. trees, $1.15 each; 2 for $1.95; 5 for $3.75.**

DWARF EVERBEARING FIG

Grow Your Own Large Sweet Figs

This new fig is fine for commercial as well as for home use, can be used as fresh fruit, canned or dried. The fig is large, straw colored thin skin, yellowish pink meat, finest flavor, sweet, prolific. The skin rarely ever cracks. Ripens fruit over a long season, starting in August and still bearing heavy in October. If your temperature does not go much below zero in winter then cut fig limbs back to 10 inches high and cover remaining stubs with about 8 inches of dirt, a few leaves or straw will also help. Do this in the fall before frosts, remove protection in the spring after danger of frost is over. The fig plants grow very rapidly after protection is removed, often growing to a height of 7 feet in one season. The fruit is produced on the 1 year wood. **Heavy well rooted 2 to 3 foot $1.35 each, 2 for $2.50.**

HARDY DISEASE RESISTANT NUT TREES

PAPER SHELLED CARPATHIAN ENGLISH WALNUT

FAMOUS HARDY CORSAN STRAIN

This hardy tree is growing in many parts of the world; the hardiest is found in Russia, Poland and Northern Carparthian mountains where the winter temperature at times drops to more than 40 degrees below zero.

It was from these countries that the original stock was brought to Canada about 20 years ago, and since then has been propagated in Michigan.

The trees have a gray colored skin, leaves are large, glossy and nicely scented. Nuts vary in size from that of the California English walnut to twice this size. Nuts fall free of hull. The shell is thin and breaks very easy. In Canada this variety is a heavy producer, grows rapidly, bears at an early age.

CHINESE BLIGHT RESISTANT CHESTNUT

GROWING YOUR OWN LARGE, SWEET CHESTNUTS IS A PLEASURE

A number of years ago the Chestnut blight destroyed the Native American Chestnuts. The U. S. Dept. of Agriculture—after many tests—introduced a type of Chinese Chestnut not only blight-resistant, but an early-bearer of large, good quality nuts. Trees start bearing when very young, often in 2 to 5 years, and succeed anywhere the American Sweet Chestnut formerly grew; in fact they can be grown over a wider area and may be grown wherever peaches thrive. We recommend planting in a well-drained, sunny location. Plant the Chinese Chestnut for attractive home ground shade trees and also reap a harvest of delicious, sweet nuts. Prices:

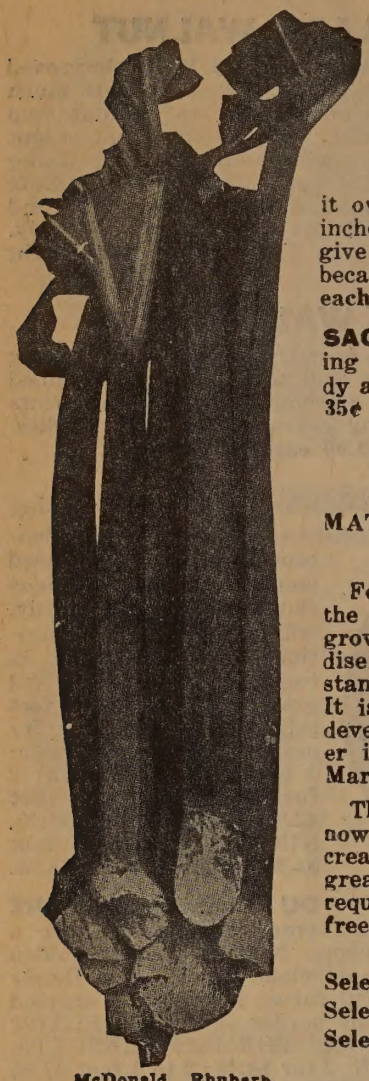
NEW RED EVERBEARING RHUBARB



McDonald Rhubarb

EVERBEARING MCDONALD RED RHUBARB—is the finest of all rhubarb. The stalks are giant in size, twice as large as ordinary rhubarb. Bright red color. Very tender and stays tender a long time. It has the richest flavor and also more sugar, therefore requires less sweetening when cooked. It makes the finest rhubarb pies and sauce you ever tasted. The skin is a bright red, but the inside flesh is white, so when the sauce is cooked it has just enough tinge of red to make it look appetizing. It is a tremendous yielder, that is why we call it everbearing, because as fast as you pull one stalk another comes up to take its place. You can use it over a much longer period of time than ordinary rhubarb. The stalks are 18 to 24 inches long, many half as thick as your wrist. Nothing you can plant in your garden will give you more returns than McDonald rhubarb. We recommend it very highly, not only because it is healthful, but because it tastes so good. Lasts a life time. **Heavy 2 yr., 75¢ each; 3 for $2.00;; 5 for $3.00; 10 for $5.45.**

SAGE—A perennial herb that is indispensable for seasoning meats and poultry stuffing, sausage, etc. Plants are hardy and will grow for years without replanting. **2 year plants, 35¢ each, 3 for $1.00, Postpaid.**

New Paradise Asparagus

MATURES A YEAR EARLIER—PLANT THIS SPRING HARVEST FIRST CROP NEXT YEAR!

For this year we offer this wonderful new variety from the market gardens of California—where only the best is grown. Again we predict that within a very short time Paradise will have supplanted all other kinds, and will be the standard market and commercial variety in all sections. It is similar in appearance to Mary Washington, and was developed as a sport of that variety by an asparagus grower in Southern California. Stems are large, same color as Mary Washington.

The opportunities for a quick profit from Paradise are now greater than ever before. With America calling for increased production of all food stuffs, canners are demanding greater and greater supplies. Paradise fully meets their requirements, being especially suitable for both canning and freezing under new process.

BEARS ABOUT 40 DAYS AFTER PLANTING

The last degree in production for perfection, size, bright color and good flavor.

The new Superfection is a tremendous bearer, in fact it is our belief that there has never been and probably never will be another Everbearing Strawberry that even approaches Superfection in qualities that make for perfection.

BIG PROFITS — 2 CROPS A YEAR. Plant this spring—pick all summer—you'll get back the price paid for the plants, and most important, a big profit besides. You'll harvest another fine crop the following June—two crops in one year. Unlike most everbearers, this variety is an excellent plant maker.

Berries are large, bright red, firm, roundish in shape, rather tart but good flavor and quality. For preserves and freezing they are excellent, because they hold their shape and color. Good for dessert or culinary uses. Very attractive in appearance and sell well on the fresh fruit market. **Prices: 25 plants for $1.90; 50 for $3.25; 100 for $5.50; 250 for $9.75; 500 for $17.50. 20TH CENTURY

A new everbearing strawberry that has both eye and taste appeal, plus being a top producer of big red, honeysweet berries of excellent quality.

Never has a strawberry become so popular as quickly as 20th Century. The reasons are simply that it produces so heavily big red berries of fine flavor.

The berries are round, of exceptionally large size from the first picking to the last. The fruit is uniform in size and has a rich red coloring all the way through, is very firm and solid, making an excellent distant shipper. The rich sweet flavor is of the best—really honeysweet, retains this delightful flavor when frozen. A berry of superior quality for freezing, jams and jellies.

Plus being a top producer, it starts bearing in about 40 days after planting and continues until frost stops it in the fall. Its yields are very heavy, as has been indicated by its record producing from July to November. Will grow in any soil or climate, also makes a good fruiting row. We recommend this new variety for your garden, you will be more than pleased. **Prices: 25 plants for $2.15; 50 for $4.00; 100 for $7.00; 250 for $15.50; 500 for $29.50. POSTPAID.**

NEW RED RICH EVERBEARING STRAWBERRY

RED RICH UNSURPASSED FOR FREEZING

Unsurpassed for freezing, RED RICH is a deep red clear through. It possesses an abundance of natural sugar—less of yours for preparation. Solid and firm, RED RICH holds its natural eye appealing qualities when thawed—it won't mush up. Too, it makes a better dessert or preserve because it is big and red and sweet.

Even in its earlier development a one acre planting of RED RICH yielded 4,000 quarts the same season it was planted. And in a second year RED RICH produced a June crop in matted rows from June 6 to July 6, like a June bearer, and then came through with a heavy yield in August, September and October to more than double the first year's crop. The crown and root system are exceptionally large as well as the leaves. It is a rugged, disease resisting plant that will produce outstanding yields.

Prices: 12 plants $2.95; 25 for $4.45; 50 for $8.45; 100 for $14.45; 250 for $32.50; 500 for $59.95; 1000 for $115.00. Postpaid.

ZILKE'S NEW 'BLACK MAGIC' EVERBEARING BLACK RASPBERRY

You may have heard of

EVERBEARING STRAWBERRIES

OR

EVERBEARING RED RASPBERRIES

or perhaps, even

EVERBEARING BLACKBERRIES

But have you ever heard of an EVERBEARING BLACK RASPBERRY? Well it's here now, ZILKE'S HAVE IT and it's really a BEAUTY.

The "Black Magic" Everbearing Raspberry ripens early, it starts to ripen with the well-known Early Logan variety. After the summer crop is picked, Black Magic begins producing on the tips of the new canes and side branches, Black Magic not only has fruit on the tips of the new wood, it develops side branches, which are also helps in extending the fruiting season. Black Magic starts with the earliest black raspberry and from there on in until fall freezing weather it has ripe berries, green berries and blossoms all at the same time.

BLACK MAGIC IS VERY HARDY

This new Black raspberry was found in the high altitude of West Virginia. Its origin at this high altitude would assure its being winter hardy and capable of thriving throughout the northern part of our country. We have fruited Black Magic in the state of Michigan for the last ten years, without winter injury to the plant or the crop.

BERRIES ARE GOOD IN SIZE AND QUALITY

The summer crop of berries are about the size of Cumberland, the fall or everbearing crop is larger than Cumberland or Logan. The canes are very vigorous and productive. Most of the berries are about ¾ of an inch in diameter when ripe. The fall crop is larger in size than the summer crop. **Price: 1 year No. 1 plants, 6 for $2.95; 12 for $4.95; 25 for $8.95; 50 for $14.45; 100 for $24.45; 250 for $54.45.**

BEARING AGE PLANTS LISTED ON PAGE 22.

THORNLESS BOYSENBERRY

OFTEN BEARS FRUIT 2 TO 3 INCHES LONG

This is the extra ripening strain of Thornless Boysenberry with canes as smooth as a grape vine. RIPENS ABOUT TWO WEEKS EARLIER THAN BOYSENBERRY. The introducer claims even heavier yields from this Thornless Boysenberry than the common Boysenberry. This new strain Thornless Boysenberry is identical to the Boysenberry except that there are no thorns and it ripens earlier. This is a good feature as the early berries bring much more money. The Thornless is as hardy, rugged and heavy bearing as its parent the Boysenberry. Vines grow long, and this pretty apple-green vine loaded with giant purple beauties is a sight you will never forget, and after you taste a handful of them, other berries will go begging for a while. Delicious with cream and sugar, and when made into jam, it's the last word. **Price: 1 year No. 1 plants, 6 for $1.10; 12 for $1.65; 25 for $2.70; 50 for $4.95; 100 for $8.95; Bearing Age Transplants, 3 for $1.40; 6 for $2.35; 12 for $4.15; 25 for $7.75. (If rose bushes are wanted by prepaid parcel post, please see page 50.)

Our bud selected Roses are 2 yr. heavy field grown, carefully budded, super size bushes that will bloom all summer and fall, producing blooms much larger than the ordinary bushes.

THE DOCTOR — The long, pointed buds open into simply enormous, yet graceful blooms, so fragrant that you can detect them many yards away. It is a pink with a life, an iridescence, a sheen beyond description. Each flower is so perfect, so gorgeous, you will consider it almost priceless.

CONDESA DE SASTAGO — It is the first fully double variety to carry the vivid color of coppery red and yellow. Very hardy, vigorous, healthy growth. Has rich raspberry perfume. Keeps well as cut flower.

PINK RADIANCE — One of the most popular varieties. Large, brilliant rose-pink. Very fragrant.

SOEUR THERESE — Long, pointed buds are chrome-yellow, heavily marked with carmine; the open flower is rich daffodil-yellow and holds its color well. Sweetbriar fragrance. Blooms come freely on splendid cutting stems.

EDITOR MCFARLAND — The perfectly formed flowers are clear brilliant, unfading pink, and as a cut flower it retains its form and lasts longer than any other rose we know. A winner of many awards. The growth is vigorous, the foliage healthy, and it blooms all the time from early summer to frost.

ECLIPSE — All purpose yellow rose. Slim tapering buds open into brilliant yellow 3 to 4 inch blooms. Blooms almost continuously all season. Long erect stems. Excellent for cutting. Fragrant.

CRIMSON GLORY — Well formed flowers of an intense, deep vivid crimson shaded oxblood-red and mellowed by a soft velvety nap are produced in abundance all season. The plants branch freely, producing a well spread, yet compact bush of good symmetry. Bush vigorous and free flowering. Excellent foliage.

GOLDEN RAPTURE — Beautifully formed long-lasting buds, fully double blooms of rich yellow on long, strong stems. Vigorous grower. Delightful fragrance.

COUNTESS VANDALL — Charmingly shaped buds of salmon-pink, stained with coppery red when open. Strong stems, vigorous and hardy.

RED RADIANCE — Cerise-red. A sport of Radiance, it has the same form, habit of growth, fragrance, and healthy foliage. The difference is in the color, which is an even shade of cerise-red. Like Radiance it is long lived, free blooming and does well under a wide variety of growing conditions.

TALISMAN — Its brilliant orange-red buds open to large, fragrant, high-pointed blooms of glowing golden yellow stained with copper-red and orange-rose on inside of petals. As the petals unfold, they become bright apricot-gold, deep rose-pink or old rose, and unlike most roses, the color becomes brighter as the flowers develop.

PRES. HOOVER — A glorious combination of cerise-toned orange, scarlet and yellow. Richly perfumed, long stemmed and free blooming. One of the most beautiful roses ever introduced.

PICTURE — We consider this one of the very finest pink roses in existence, a clear pink with just a trace of salmon to give it a warm glow. Delightfully fragrant. The blooms are perfect in bud and when open. Very vigorous plant which blooms continuously.

CALEDONIA — This is the favorite and the best white rose for the middle west. Buds and flowers glistening, snowy white. Foliage exceptionally shiny and clean, seems to bloom much longer than any other hybrid tea.

REX ANDERSON — An outstanding exhibition rose of delicate, lovely ivory-white. Perfectly formed, slow opening, one of the best whites. Flowers fully double and of enormous size.

CHARLOTTE ARMSTRONG — One of the world's best roses; winner of many honors. Magnificent in the garden because of its great vigor, disease-resistant foliage and freedom of bloom. Long streamlined carmine buds open into enchanting flowers of the loveliest cerise, beautiful at all stages. Long stems fine for cutting.

CHRISTOPHER STONE — A most exciting new rose —a brilliant, sparkling scarlet-crimson without a trace of blue. Shapely long pointed buds open into large attractive flowers with the true old damask rose fragrance. A healthy, vigorous grower and exceedingly free-blooomer. Stands lots of heat. One of the best red roses.

ETOILE DE HOLLANDE — Large, velvety crimson flower produced in great profusion throughout summer. Deliciously perfumed. Vigorous upright grower. An excellent red rose.

ZULA QUEEN — A variety which is here to stay, beats all others; best near black Rose in our estimation. Deep velvety crimson, fragrant and very lasting. A vigorous shrubby plant, with almost single flowers of deep blackish scarlet.

POINSETTIA — One of the most brilliant scarlet roses we know of. The true poinsettia color. Bush is sturdy, hardy and a good grower. Buds are long, borne in abundance and open slowly into gorgeous blooms.

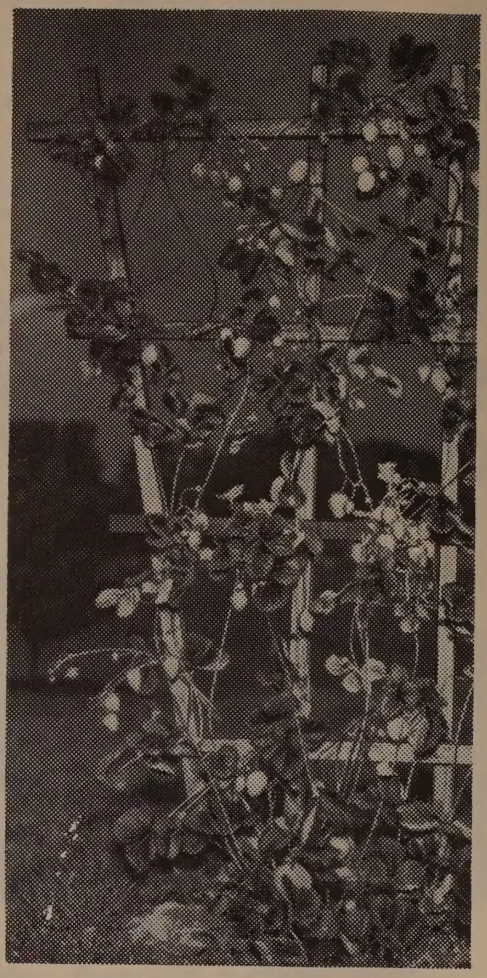
Most Exciting New Discovery of the Strawberry World!

YES—ITS TRUE—ITS REAL—ITS DIFFERENT

THE ROMANTIC STORY OF

Sonjana

(Hummel) Plant Patent 1691



THE NEW CLIMBING EVERBEARING STRAWBERRY

Yes, Sonjana is a real strawberry but it is entirely different from any that has ever before been seen in America. For Sonjana is really a handsome ornamental which will beautify your garden from spring until late fall. Unlike the ordinary strawberry, the runners it sends out do not have to be rooted in the soil. Trained on trellis, fence or wall these sturdy stems form dozens of rosettes, which bear a profusion of blossoms and berries. The result is a strikingly beautiful mass of deep green foliage, accented by charming white flowers, bright green berries and rich red delicious fruit all at the same time. Sonjana is a new true ornamental, unlike anything ever seen before in the gardens of America.

You and your friends, too, will marvel at the way you can train Sonjana's sturdy runners up and up, four, five, even six feet. You'll be amazed as it buds out a dozen or more clusters of rich, green foliage the very first year and as many as 30 or more the second year. You'll thrill to the superb decorative effect as the clusters of foliage develop white blooms and then luscious red berries month after month throughout the summer and fall. Sonjana is truly everbearing, for it continues to bear firm, fragrant, delightful fruit from spring clear through until frost in the fall.

HOW Sonjana WAS DISCOVERED AND BROUGHT TO AMERICA

Sonjana is not a "horticultural accident." It was developed over a long period of years by the knowledge, the skill and the tenacity of one man, Reinhold Hummel. Mr. Hummel began his experiments in Germany before World War II. The grim days of the war interrupted his work but afterward he salvaged a few of his precious plants and continued patiently hybridizing these in his effort to create the new plant which he had set as his goal. His patience was finally rewarded with the perfect plant—long upward-thrusting, vine-like runners, a sturdy root system which would support the lush growth, persistent bloom throughout the season and firm fruit with a delicate flavor. Proudly he named it after his lovely little daughter Sonja.

A TRUE PERENNIAL

TO GROW, BLOOM AND BEAR FRUIT YEAR AFTER YEAR IN YOUR GARDEN

When you plant Sonjanas in your garden it is not just for this year or next. Sonjanas grow rapidly, reaching their full strength and beauty the second year. Then they continue to thrive and grow and blossom and bear fruit year after year. Of course, they need reasonable care and attention. They will respond to watering, to mulching, to good soil and to liberal fertilization, just as any plant does. Simple, easily followed instructions come, free, with every order.

YOU'LL RELISH ITS DELECTABLE FRUIT

Only those who have traveled in Europe and tasted the exquisite flavor of the European strawberry can anticipate the firm texture, the aroma and the delightful taste of Sonjana. As the berries are borne on clusters all the way up the vines, you and your guests can have the pleasure of picking the clean, ripe fruit, head-high, before your eyes, and eating them on the spot as you marvel at the show of blossoms which promise more to come. You'll love Sonjana. . . .

TRAIN ON WALLS, FENCES OR TRELLISES

There are limitless opportunities for using Sonjana to add to the charm and beauty of your garden. It loves a sunny corner, it climbs and festoons a fence or trellis. Its masses of verdure and bright flowers and berries will adorn a garden wall. Since each plant needs only a tiny parcel of ground (about two square feet) Sonjana is an ideal ornamental for the compact patio or garden of the city. Suburban and country home owners will find that relatively few of these vigorous plants will provide decorative cover for yards and yards of fence or wall.

The flowers of this first representative of the Grandiflora class are exquisitely formed and high-centered like a Hybrid Tea. Flowers are borne on long, almost thornless stems which are ideal for cutting. Blooms are carried both singly and in clusters after the manner of the Floribundas and hold exceptionally well when out. Queen Elizabeth is a cross between Charlotte Armstrong the famous Hybrid Tea and Floradora, a Floribunda. Both of the parents were recipients of the All-American Rose award, A. A. R. S. award for 1955. Plant Patent No. 1259. **Prices: $2.50 each; 3 for $6.60, Postpaid.**

Long tapering buds unfold even in adverse weather, opening to large, high centered flowers measuring 4½ to 5 inches with 40 to 50 wide petals. These are borne on sturdy, medium long stems. The opening of each glorious rose is a thrilling spectacle of changing iridescent shades of red. In growth, CHRYSLER IMPERIAL ROSE is compact and symmetrical. The petals roll gracefully out to form a very double flower attractively cupped and with a high-centered golden heart. Has from 40 to 45 large petals. The fragrance is delicate. The plant is vigorous and disease-resistant. Flowers are borne on heavy stems above the mass of glossy, hollylike foliage, and are produced in glorious succession until frost. Plant Pat. Easy to Grow — Long to Live — Save REPLACEMENT EXPENSE

These are the famous Brownell Sub-Zero Roses — a New Race of hardiness previously unknown in Roses. They are more vigorous, can live many times longer, are easier to grow, bloom more abundantly and more consistently, and their size, form and color compare with the best of the common Roses. Why? Because they are bred back to hardy species. They are super-hardy roses that won't kill out even in temperatures that dip 20 degrees below zero. The technical meaning of "Sub-Zero" is wood safe to about 15 degrees below zero unprotected; hilled up with a little clean dirt 25 degrees below and colder; well hilled up about 95 per cent safe at 40 degrees below. Because they are so hardy we guarantee them to live through one year without winter killing. Best of all they are free blooming, and the flowers last a long time. The "Miracle Plant Food"

Ra-Pid-Gro

A complete, quickly available, easily prepared plant food by merely adding one pound of RA-PID-GRO to 22 gallons of water

WHAT IS RA-PID-GRO?

RA-PID-GRO is a complete concentrated plant food formula. Easily made into an immediately effective liquid fertilizer by simply adding water. It will speed up growth of plants now in place and will assure more successful transplanting of new plants.

HOW IS IT USED?

RA-PID-GRO is so easily prepared for use. Just add water at the rate of 1 lb. of RA-PID-GRO to 22 gallons of water. Allow to dissolve and it's ready for use. Apply around each plant according to directions on the bag. For use on small numbers of plants mix at the rate of a teaspoonful to the quart of water. Also very valuable for use when transplanting. Dip plants in solution for 3 or 4 minutes, then set in place and water with remainder of liquid. Practically eliminates losses.

WHAT WILL IT DO?

RA-PID-GRO will work almost unbelievable miracles in promoting rapid and healthy growth on all types of plants. Use it on lawns, around shade trees, evergreens, shrubs, roses, perennials, vegetables and house plants. Many times plants which have been given up for dead will respond to applications of RA-PID-GRO. All the vital plant food elements are present in this remarkable discovery and since it is applied in liquid form, are readily available to the roots of the plant.

HOW DOES ITS COST COMPARE WITH OTHER FERTILIZERS?

RA-PID-GRO is less expensive than other fertilizers. In the larger quantities it makes your fertilizer cost about ½ cent per pound as against a cost of about 3 cents per pound for average fertilizers. Remember, 1 pound of RA-PID-GRO makes 176 pounds of rich and complete plant food.
